Breaking News

The International Association of Athletics Federations (IAAF) is ready to disqualify Semenya from future events and advise her to have immediate surgery because her condition carries grave health risks. They have also not ruled out stripping Semenya of her 800m-world championships gold medal. Semenya, 18, has three times the amount of testosterone that a "normal" female would have. According to a source closely involved with the Semenya examinations IAAF testing, which included various scans, has revealed she has internal testes - the male sexual organs which produce testosterone.
